

HIGH FIRE GLAZE PRICES

as of 22nd Sep 2011

Chrysanthos High Fire Glaze is a range of glaze varieties aimed more at the sophisticated user. These glazes are specifically formulated for application to mid fire clays that are to be glaze fired to between cone 4 (1,186°C) and cone 6 (1,222°C). Generally, to obtain optimum results, 3 - 4 coats of the metallic glazes and 2 - 3 coats of the other glazes should be applied using a fully loaded brush. Ensure each coat is dry before applying subsequent coats at right angles to each other.
